

Child Development and Education (with MyEducationLab) (4th Edition)

With a unique and engaging perspective, *Child Development and Education, Fourth Edition* is the only comprehensive child development text written specifically for educators. Because it is written by a developmentalist and an educational psychologist team, it provides the coverage and research found in more traditional child development texts but also then helps readers understand how to use this information as educators. Unique features include: how the text illustrates key concepts by using childrens and adolescents schoolwork, artwork, and interview excerpts, as well as case studies and video examples authentic artifacts from children and adolescents; Observation Guidelines tables with educational applications; Development and Practice features with concrete strategies for facilitating childrens development and learning; and extensive coverage of diversity and its implications for helping all youngsters thrive. New to the fourth edition, accompanying each text is an innovative online resource, MyEducationLab, containing Building Teaching Skills exercises, practice quizzes, homework and review exercises, videos for analysis, Understanding Research exercises (in which students read and interpret research articles), and supplementary readings. All of the many features of the text and its abundant resources help readers actually see development, not simply read about it preparing educators and those working with children and adolescents to apply development concepts to actual practice.
