

Enrique Iglesias (Real-Life Reader Biography)

Real-Life Reader Biographies present the lives of contemporary role models for young readers. These are the stories of real men and women who, despite many obstacles, followed their dreams. Yes, Enrique Iglesias is the son of Latin crooner, Julio. But he doesn't want to use his birthright to open doors. In fact, Enrique wants to do it all the hard way. He wants fame on his own terms. Born in Madrid, Spain in 1975, he moved to Miami when he was seven years old. His mother (who was divorced from his father by that time) sent Enrique and his brother Julio Jose to live with their father when their grandfather was kidnapped in Spain and held for ransom. The family was afraid the boys would be next. Enrique grew up in his father's mansion, yearning for a music career he could call his own. But he did not want to follow in his father's footsteps. For a year, Enrique looked for a record label that would sign him. He used the name Enrique Martinez. All the major record labels declined. Then he used his real name. The major record labels passed again. When a small California record label called Fonovisa took a chance on Enrique, he returned the favor by becoming an international recording superstar. The rest is history.
