

## Target Science: Chemistry Foundation Tier - AQA Modular Science

Target Science (Modular Science AQA) is a series of three science books designed to fit the AQA Examination Board syllabus/specification Modular Science. It has been created from the Target Science series - and includes essentially the same content. It is presented in a different order to satisfy the specific AQA Modular Science examination. The text is designed for students typically studying for public examinations at age 16+. It is aimed at the average/below average student. The text is organised in double-page spreads and designed to be as accessible as possible. There is a much higher proportion of open space used to help lower ability students. The reading level has been closely controlled and the amount of text restricted. Glossaries of new terms are provided at the end of each module. Multiple-choice and examination-style questions are included.
