

Life Cycle of a Spider

The stages of a spiders life are explained through simple text and photographs. This title is one of a series that looks at the life cycles of some familiar plants and animals. The stages are explained through simple text and photographs. Every spread builds on information presented in the previous one. At this stage, children should understand that animals move, feed, use their senses, and reproduce; and that flowering plants grow and produce seeds which, in turn, produce new plants.
