

Molten Memoirs: Ignoring the Rational Voice - The Fascinating Story of the Volcano Holdouts of Salem Montserrat (Essays,Rumors, Field Notes and Photographs)

Molten Memoirs: Ignoring the Rational Voice - Essays, Rumors, Field Notes and Photographs from the Edge of Fury: A guidebook for that little bit of Disaster Freak in all of us... (non-fiction) (*8746+ copies circulated in original independent release) The Fascinating story of the volcano holdouts of Salem, Montserrat told through the woven memoirs of a global artist who (haunted by disaster) decides to go toward the light... The author pitched his tent with the terrified, courageous, and defiant citizens of Salem village on the tiny Caribbean island of Montserrat. 200 of them refused to give up their community to either the over-boiling volcano to the south or the over-protective government to the north, not without a fight. Salem was only three and a half miles from the volcano's vent. In the debris field of the disaster, the dusty palm-crested village was constantly ashed and pelted by discharged pumice and was in the direct path of future deadly pyroclastic lava flows from a mountain that scientists predicted would violently explode at any moment. And the village was under threat from the army and police who felt an urgent responsibility to not allow the holdouts of Salem to commit mass suicide on their watch. A very interesting, rare, and thoughtful street study told from the inside out through essays, rumors, field notes, photographs, and the memoirs of an American artist seeking spiritual validation outside mainstream beliefs and who is guided in his unintentional quest by gods of a different color. Follow his curse (or blessing) as he inadvertently prepares himself over a lifetime of getting involved with disasters of almost every sort. These encounters result in the author falling off a cliff, getting swept away in flash floodwaters, being twice knocked unconscious by lightning, and being shaken by a 7-point earthquake while working as a combat photographer in Central America. Taking

the inevitable disasters for granted and choosing to see them in his global artwork as theater rather than fury, he flies from his studio in Kansas and pitches his tent in the restricted death zone of a volcanic eruption ----- where he ends up getting way more volcano than he bargained for...
