

The First Session with Children and Adolescents: Conducting a Comprehensive Mental Health Evaluation

This book provides a thorough, practical primer on carrying out an initial mental health evaluation with a child or adolescent client. The emphasis is on efficiently eliciting the information needed for formulating the young persons difficulties, clarifying the diagnostic situation, and planning for treatment or referral, within the context of a caring, respectful professional relationship. Beginning with the first contact with a new client, the reader is taken step-by-step through the collection and integration of observational, interview, background, and collateral information. Important issues covered include structuring the evaluation session, effective record keeping, confidentiality concerns, and providing feedback to parents. Reflecting the authors 25+ years of professional experience, the book is filled with interview segments that bring the practical business of child assessment to life.
