Geohydrology of the unsaturated zone at the burial site for low-level radioactive waste near Beatty, Nye County, Nevada (U.S. Geological Survey water-supply paper)

Low-level radioactive solid waste has been buried in trenches at a site near Beatty, In 1976, as part of a national program, the U.S. Geological Survey began a Soil-water potential, measured to depths of 3 to 10 m, ranged from -10 to -70 bars. burial site for low-level radioactive waste near Beatty, Nye County, Nevada **Safe Disposal of Radionuclides in Low-level Radioactive Waste - Google Books Result** Desert Research Site near Beatty, Nye County, Nevada, 200306.
